MedLocker™

24/7 PRESCRIPTION COLLECTION KIOSK

AUTOMATED DISPENSING OF MEDICAL PRESCRIPTION

A large part of your prescription are repeat prescription which can be easily prepared in time for your clients. Logimatiq has developed a self serve pick-up with MedLocker™ where clients - 24/7 can safely collect their packages without the assistance of a Pharmacy employee. Efficient and very customer-friendly!

With MedLocker™, you can provide a service to your client at any time. Even outside normal opening hours! MedLocker™ is a self serve cabinet with many positions within a small space. MedLocker™ delivers prepared medication to your clients after they have received a pick-up message. Your clients no longer have to wait for their medication!

MedLocker™ is available in refrigerated and non-refrigerated models. The refrigerated MedLocker™ is based on a medical refrigerator. Would you like to know more about how the MedLocker™ and refrigerated MedLocker™ work? The Logimatiq team will be pleased to help you!

How does the MedLocker™ work?

MedLocker™ is controlled by Software. The cabinet automatically provides information about where the prescription is being stored and from where it can be removed.

Your employee logs in using the cabinet's touch screen and connects a scanner to the cabinet externally.

After scanning a prescription, MedLocker™ automatically opens a slot where the prescription can be placed. The employee can choose a small or large slot.

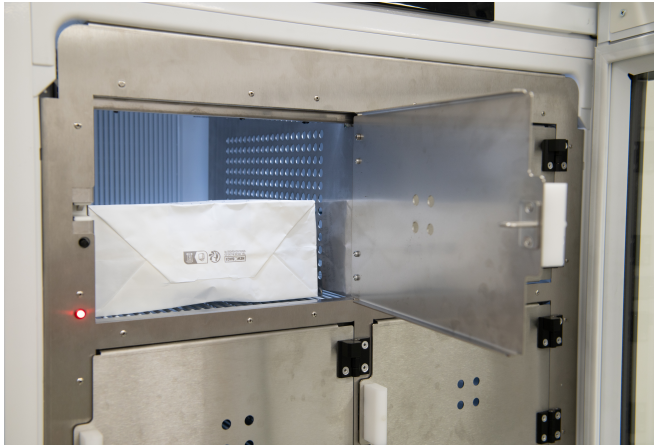

As soon as the prescription has been placed into the slot, a notification with a pick-up code will be sent to the client automatically. The client can now use the pick-up code to open the slot that contains their prescription.

BENEFITS

- ✓ Clients doesn't need to endure any unnecessary waiting time and will greatly appreciate this.
- ✓ Clients no longer need to visit the counter. MedLocker saves an average of 4 minutes per prescription at the counter.
- ✓ Pick-up times are distributed evenly, preventing long queues.
- ✓ MedLocker can be useful for a Pharmacy service point. You can manage MedLocker from the pharmacy via our cloud Software solution.
- ✓ In an average pharmacy, MedLocker can save the equivalent of 0.5 full-time employee hours.

Cooler MedLocker™

The Cooler MedLocker™ for hospital

Typically installed in hospitals, the Cooler MedLocker is equipped with a Liebherr refrigerator specially designed for medications. It allows the collection of prescriptions requiring a refrigerated and constant temperature.
